| ZINNIA             | pot         | 16   | \$4.00  | \$4.00  | \$4.00  |

1. The first step in the process is to identify the problem or goal that needs to be addressed.

2. Once the problem is identified, the next step is to gather relevant information and data.

3. After gathering information, the next step is to analyze the data and identify potential solutions.

4. Once potential solutions are identified, the next step is to evaluate them based on their feasibility and effectiveness.

5. After evaluating the solutions, the next step is to select the most appropriate solution and implement it.

6. Finally, the last step in the process is to monitor the results and make adjustments as needed.

7. The final step in the process is to evaluate the overall outcome and determine if the goal has been achieved.

8. Once the goal has been achieved, the next step is to document the process and results for future reference.

9. The final step in the process is to share the results and lessons learned with others who may be facing similar challenges.
